How MH Keeps User Preferences & Context

MH profile file: user's preferences:

- overall configuration
- options for MH commands and "versions"

Context file:

- name of current folder
- Information re: other users' folders you access

In each folder: sequences file

- current message number in that folder
- named sequences of messages

Each user can have many MH profiles and contexts.
Programs can set their own, so don't interfere with user.
