Example of MH Command-line Interface

(Using UNIX to store MH shortcuts)

```
% alias pstat \
   'show `pick -subj "status report"` | lpr'
% pstat
```

...prints status reports...

```
$ handle()
> { repl $* && rmm && next ; }
$ show 77
```

...message 77 appears...

```
$ handle
```

...reply to message 77, remove it and show next message...
