Simple Shell Script with MH

(*fols* — 1 of 2)

List folder names in columns

- Shorten long names in middle, replace characters with equal sign (=).
- Put plus sign (+) at end of current folder name.

Example with nine folders listed:

```
% fols -r
drafts                 drafts/DELETE       inbox+          inbox/DELETE
mh-users_tosave        mh-users=ve/DELETE  mh-workers      reference
reference/DELETE
```
