Simple Shell Script with MH

(*resend* — 1 of 2)

Re-sends bounced mail messages: Deletes error messages to get original draft. Example:

```
% comp
        ...
What now? push
% ...Time passes...
You have new mail.
% inc
  45+  MAILER-DAEMON      Returned mail: Host unknown
% show
        ...Nasty-gram from MAILER-DAEMON...
% resend
        ...My editor (vi) starts, I fix the address...
What now? push
% rmm
```
